Lab Report: Model comparison on benchmarks

1 Introduction

In this report we compare several models on standard benchmarks. Each experiment was repeated 3 times with different random seeds. The dataset was split into 80 percent training data and the rest for testing.

2 Results

Figure 1 shows the test accuracy during training.

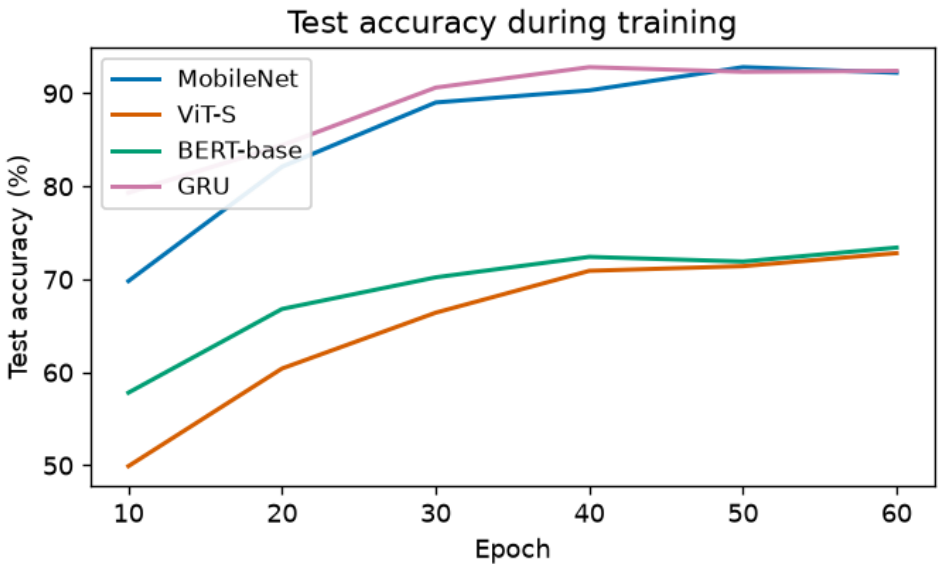

Figure 1: Test accuracy during training for the models in this experiment.

GRU outperforms BERT-base by 19.0 percentage points at epoch 60 (Figure 1). MobileNet outperforms ViT-S by 24.1 percentage points at epoch 40.

Figure 2 shows the f1 score during training.

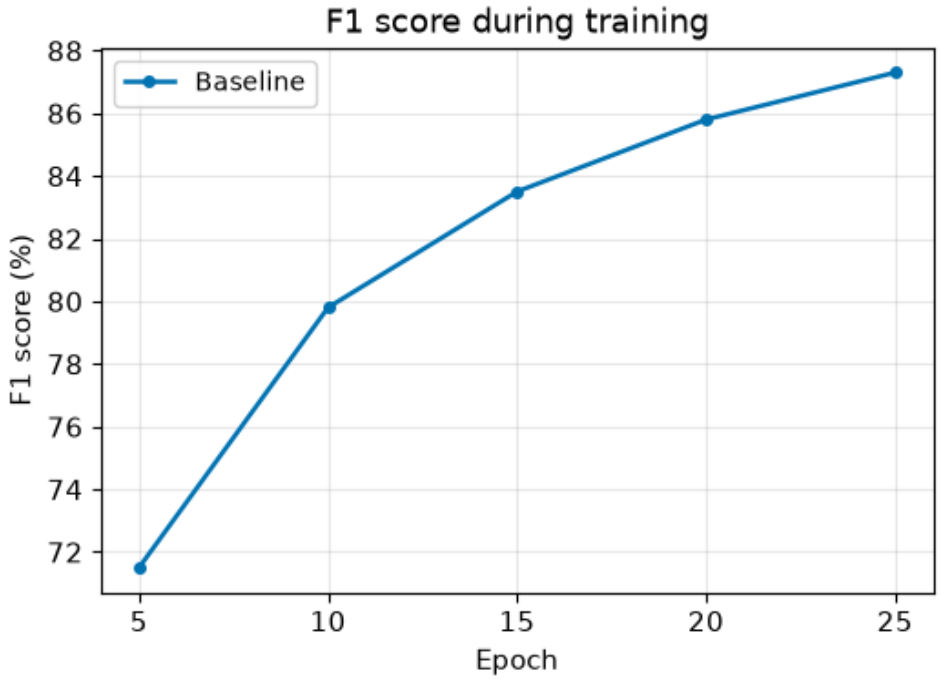

Figure 2: F1 score during training for the models in this experiment.

At epoch 10, Baseline achieves 71.5% F1 score. Baseline attains a F1 score of 80% at epoch 10.

3 Discussion

On Yelp, Random Forest obtains an accuracy of 84.6%. Overall, the results are in line with what we expected from the literature.
