Lab Report: Model comparison on benchmarks

1 Introduction

In this report we compare several models on standard benchmarks. We trained each model for 20 epochs with a batch size of 32. The dataset was split into 70 percent training data and the rest for testing.

2 Results

Figure 1 shows the training loss.

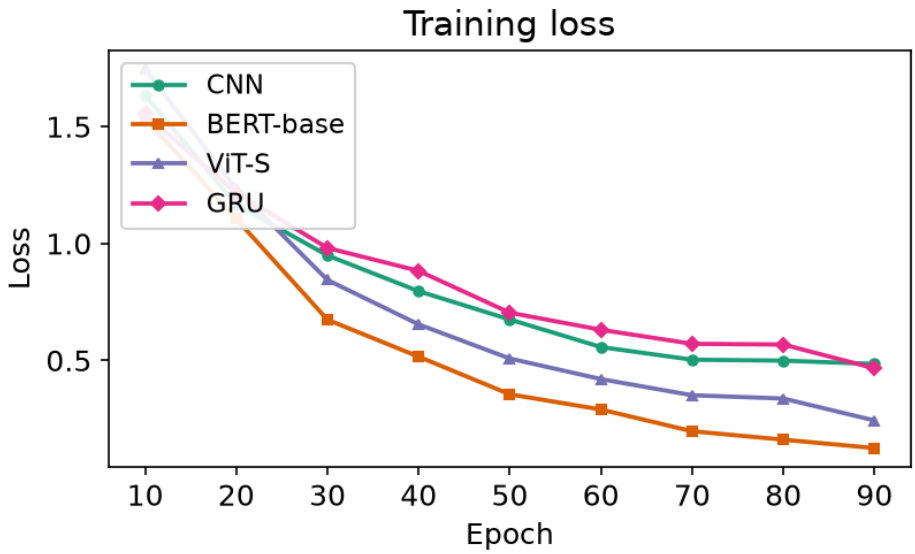

Figure 1: Training loss for the models in this experiment.

As shown in Figure 1, at epoch 40, the loss of BERT-base is 0.873. At epoch 70, the loss of GRU is 0.571. As shown in Figure 1, at epoch 90, the loss of GRU is 0.109. GRU has a loss of 0.568 at epoch 80.

Figure 2 shows the training loss.

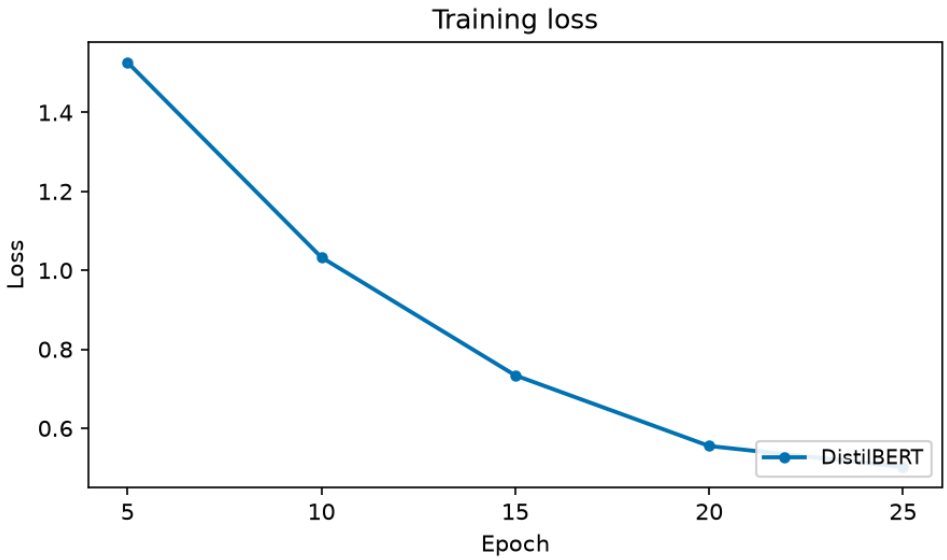

Figure 2: Training loss for the models in this experiment.

As shown in Figure 2, at epoch 25, the loss of DistilBERT is over 0.4. As shown in Figure 2, DistilBERT has a loss of -0.062 at epoch 25. At epoch 5, the loss of DistilBERT is 1.527 (Figure 2).

3 Discussion

The differences between the models are discussed in the next section.
