Lab Report: Model comparison on benchmarks

1 Introduction

In this report we compare several models on standard benchmarks. The learning rate was set to 0.01 with the Adam optimizer. All experiments were run on a single GPU with 16 GB of memory.

2 Results

Figure 1 shows the training loss.

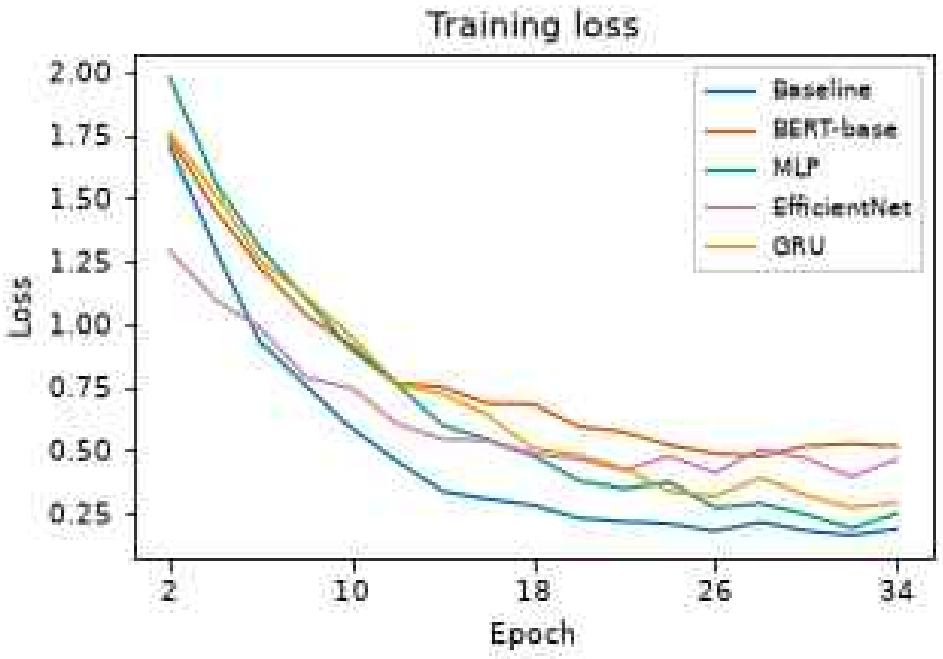

Figure 1: Training loss for the models in this experiment.

GRU has a loss of 0.455 at epoch 12. At epoch 16, the loss of Baseline is -0.093.

Figure 2 shows the f1 score during training.

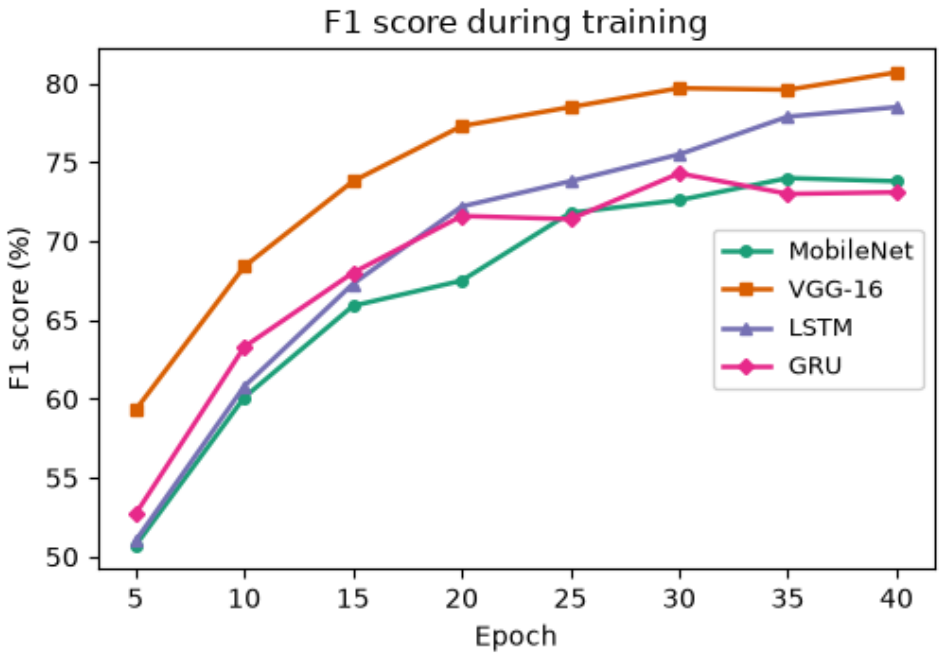

Figure 2: F1 score during training for the models in this experiment.

VGG-16 outperforms MobileNet by 8 percentage points at epoch 10. Epoch 5 sees GRU post a F1 score of

36.2% (Figure 2).

3 Discussion

The differences between the models are discussed in the next section.
