Lab Report: Image classification experiments

1 Introduction

In this report we compare several models on standard benchmarks. The dataset was split into 70 percent training data and the rest for testing. Each experiment was repeated 5 times with different random seeds.

2 Results

Figure 1 shows the f1 score during training.

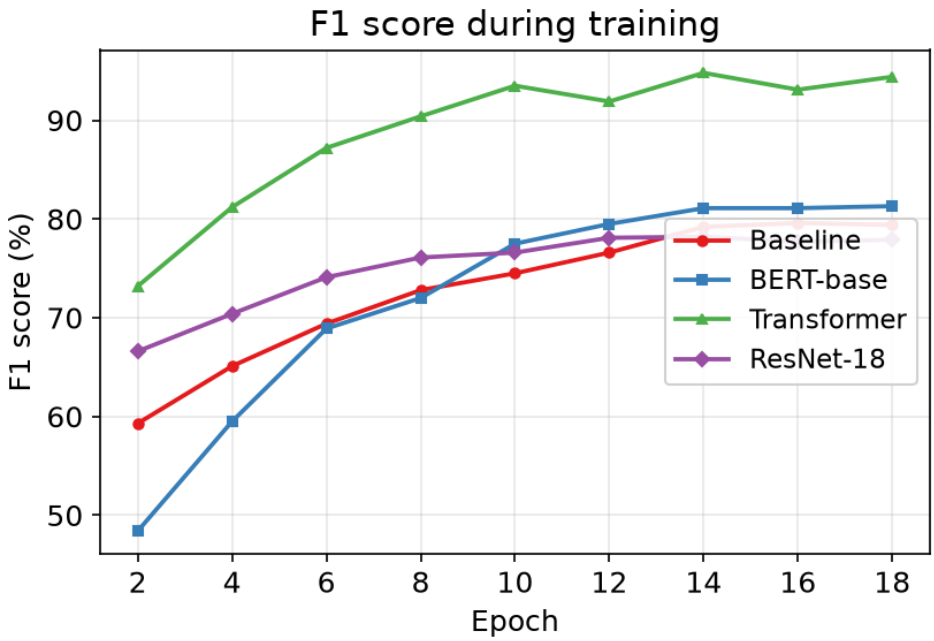

Figure 1: F1 score during training for the models in this experiment.

At epoch 14, Baseline achieves 94.8% F1 score. From epoch 4 to epoch 10, the F1 score of Transformer improves by a relative 2.6%. From epoch 8 to epoch 16, the F1 score of Baseline improves by a relative 12.8%.

Figure 2 shows the f1 score during training.

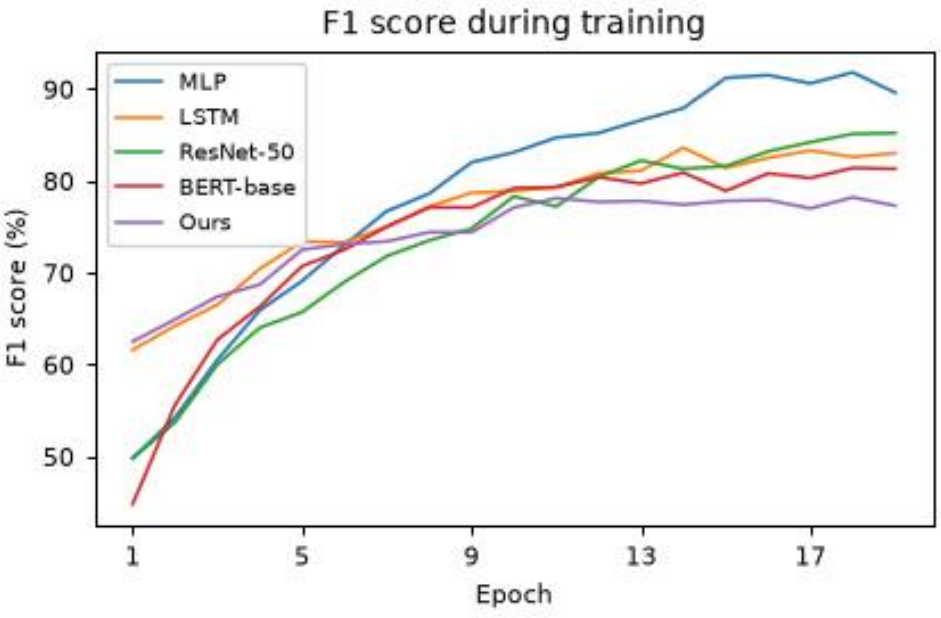

Figure 2: F1 score during training for the models in this experiment.

As shown in Figure 2, MLP reaches 93.4% F1 score at epoch 10. From epoch 7 to epoch 13, the F1 score of BERT-base improves by a relative 6% (Figure 2).

3 Discussion

Overall, the results are in line with what we expected from the literature.
