Lab Report: Training dynamics of deep models

1 Introduction

In this report we compare several models on standard benchmarks. We trained each model for 30 epochs with a batch size of 128. The learning rate was set to 0.0003 with the Adam optimizer.

2 Results

Figure 1 shows the accuracy during training.

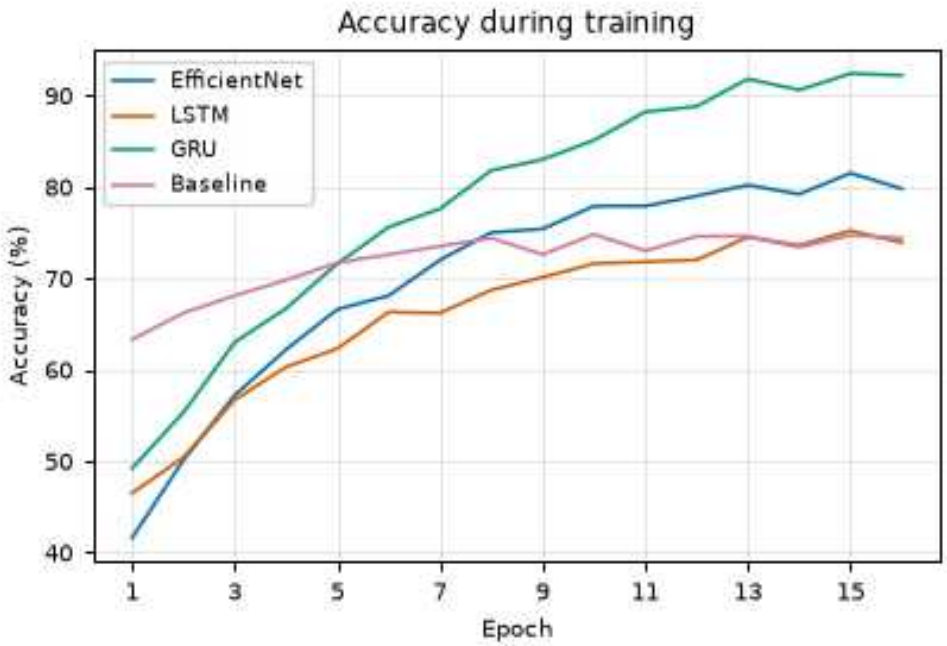

Figure 1: Accuracy during training for the models in this experiment.

As shown in Figure 1, at epoch 1, Baseline achieves 62.2% accuracy. At epoch 4, EfficientNet achieves 51.0% accuracy.

Figure 2 shows the validation accuracy of ResNet-50 by dataset.

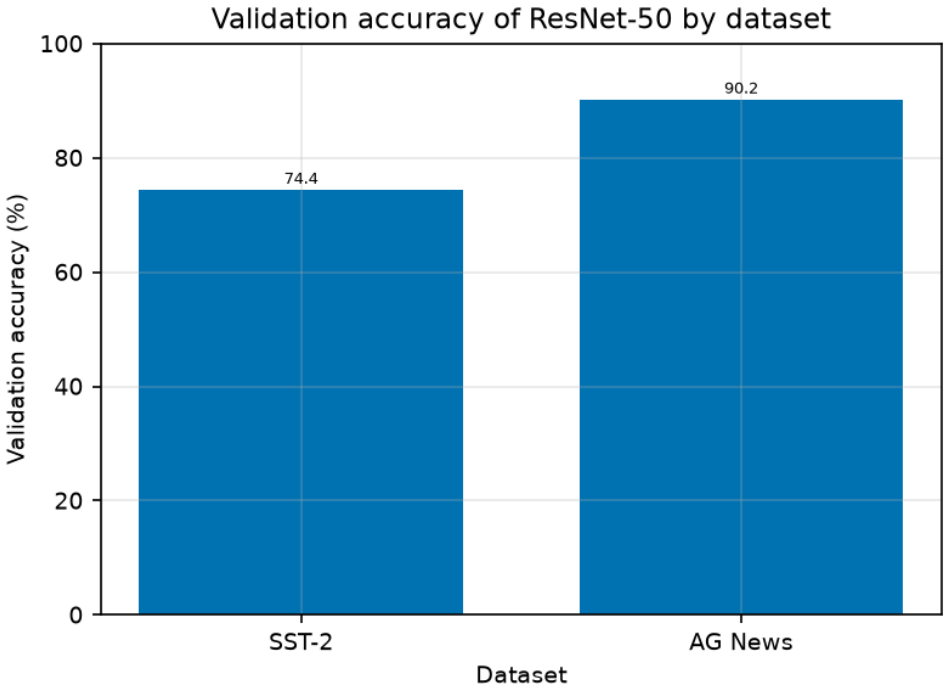

Figure 2: Validation accuracy of ResNet-50 by dataset for the models in this experiment.

ResNet-50 achieves 74% validation accuracy on SST-2. ResNet-50 reaches 64.4% validation accuracy on SST-2.

3 Discussion

On STL-10, SVM obtains an accuracy of 65.9%. Overall, the results are in line with what we expected from the literature.
